FACULTY

illiam J. Hanney, *PT, PhD, ATC/L, CSCS, MTC* is a clinician, researcher and educator who currently serves as an instructor at the University of Central Florida School of Physical Therapy where he teaches and conducts clinical research. Additionally, he maintains a clinical practice at Brooks Rehabilitation. Dr. Hanney earned his undergraduate degree from the University of West Florida for studies in Sports Medicine/Athletic Training and his Master and Doctor of Physical Therapy degrees at the University of St. Augustine for Health Sciences. He recently earned his Ph.D. at Nova Southeastern University with research interests in the treatment of cervicogenic pain. His clinical practice focuses on the treatment of orthopedic conditions with a special interest in core stabilization and muscular control. He is an experienced educator, clinician and author having presented/published nationally in the areas of biomechanics, rehabilitation and sports medicine. Dr Hanney maintains involvement in the APTA, the National Strength and Conditioning Association, The American Academy of Orthopedic Manual Physical Therapists and the National Athletic Trainers Association.

OBJECTIVES

Participant will be able to:

Identify the most common clinical presentations associated with the lumbo pelvic complex.

Identify examination findings associated with the most common clinical presentations in patients with lumbosacral pain.

Identify treatment progressions based on clinical presentation and how to progress/regress treatment.

Demonstrate treatment procedures for a given clinical presentation.

Identify how treatment pathways may be altered for unique clinical situations in those with lumbosacral pain.

SEMINAR DESCRIPTION

ow back pain is a significant contributor to disability worldwide and is one of the most common conditions for which patients seek care. Treatment approaches can often be confusing due to dogmatic classification systems, which can be overly complicated and difficult to apply in a clinically meaningful way. However, patients with regional disorders often present with similar clinical presentations. These clinical presentations can often guide clinicians towards the best treatment options.

This course is designed to be eclectic in its delivery to best suit the needs the busy clinician. Treatment approaches are organized based on categories that are consistent with how patients that report low back pain are likely to present. Patients presenting with chronic low back pain, referred leg pain, SI dysfunction or even stenosis will often respond to similar treatment approaches. This course will provide treatment options in a multimodal context that are grouped to address the most common clinical presentations. Finally, treatment approaches are organized in a logical way providing examples of how the treatments could be integrated.

PARTICIPANTS COMMENTS

"Great Course!! Well instructed. Both practical and useful for all levels"

"Every concept was explained, routed in evidence and then followed up with hands on application"

"One of the most informative, relevant & useful courses I have attended. Brilliant speaker.

"Relevant & useful. Presenter actively engaged"

"Terrific instructor who was flexible and sensitive to class needs."

COURSE SCHEDULE

8:00	Registration and Continental Breakfast		
8:30	Clinical Anatomy		
10:00	Break		
10:15	Outcomes for Lumbosacral disorders		
11:00	Clinical presentation; clinical pathways		
12:00	LUNCH (on your own)		
1:00	Clinical Decision Making		
1:30	Managing chronic LBP		
	Demonstration and Practice Lab		
3:15	Break		
3:30	Radiculopathy & Referred Leg Pain		
	Demonstration and Practice Lab		
5:30	Q/A and Adjourn		
Day 2			
8:00	General Non-Specific LBP		
	Demonstration and Practice Lab		
10:00	Break		
10:15	Lumbar Instability		
	Demonstration and Practice Lab		
12:00	LUNCH (on your own)		
1:00	SI Dysfunction		
	Demonstration and Practice Lab		
2:45	Break		
3:00	Stenosis		
	Demonstration and Practice Lab		
	0.44		
5:00	Q/A and Adjourn		

REGISTRATION
